CPSE 462 - Tch Math to Stdnts w/Disablts
Spring 2014

Section 001: 341 MCKB on T Th from 1:00 pm - 3:50 pm

Instructor/TA Info

Instructor Information
Name: Gordon Gibb
Office Location: 340G MCKB
Office Phone: 801-422-4915
Email: gordon_gibb@byu.edu

Course Information

Description
This course prepares participants to teach mathematics to students with disabilities. Participants will learn research-validated methods for assessment, planning, and explicit and cognitively-guided instruction for math skills and concepts.

Learning Outcomes

**Current mathematics research**
1. Describe research and results for current mathematics research for National Council of Teachers of Mathematics standards.

**Focused and Survey Curriculum Based Assessment**
2. Develop Focused and Survey Curriculum Based Assessment.

**PLAAFP**
3. Write Present Levels of Academic and Functional Performance (PLAAFP) statements and IEP goals based on informal assessment data. Create a scope and sequence of skills.

**IEP goals and objectives lesson plan**
4. Write lesson plans to address IEP goals and objectives.

**Instruction presentation techniques**
5. Demonstrate direct instruction presentation techniques.

**Data systems for monitoring student progress**
6. Design data systems for monitoring student progress.

**Morningside Math lesson**
7. Demonstrate one Morningside Math lesson, with data management

Grading Policy

- All assignments are due in full on the date indicated.
- Assignments submitted one class period after the due date will earn up to 50% credit. Assignments will not be accepted more than one class date late.

Attendance Policy

You will earn 2 points for arriving to class on time, 1 point for arriving after the prayer, and 0 points for missing class.

Bibliography

Conceptual Framework for this Course

Moral endeavor in this course is established upon principles of eternal and unchanging truth contained in the restored gospel of Jesus Christ. Prophets of God proclaim that “all human beings—male and female—are created in the image of God. Each is a beloved spirit son or daughter of heavenly parents, and, as such, each has a divine nature and destiny.”

Teaching is a moral endeavor that recognizes and responds to the divine destiny of each student. Moral teachers ensure that students master the knowledge, skills, and dispositions necessary to realize their divine potential for growth and achievement. Therefore, teachers:

1. Recognize and cultivate the individual worth of each student
2. Embrace and apply proven instructional practice
3. Establish and maintain positive, supportive learning environments
4. Value and enact respectful interpersonal behavior and responsible citizenship.

Four assumptions guide our work:

1. All children can learn.
2. Schools exist to advance student learning.
3. Teachers are accountable for student learning.
4. Accountability is measured by data.

Course Objectives

Participants will

1. Administer and score a general math CBA for multiple elementary students.
2. Use math CBA to assess elementary students.
3. Record and analyze CBA data and use to group students for instruction.
4. Plan two summer practicum math units with accompanying focused CBAs.
5. Create and teach five direct instruction math lessons.
6. Create and teach one cognitively-guided instruction (CGI) lesson.

The Mission of Brigham Young University Special Education
We maximize the potential of diverse learners with individualized educational needs to elevate their quality of life. We accomplish this by supporting the mission and aims of a BYU education as we integrate teaching, research, and service. We specifically:

- prepare competent and moral educators who select, implement, and evaluate research-based effective teaching practices and appropriate curriculum for learners with special needs.
- prepare master special educators who will provide collaborative leadership to foster the moral development and improve learning and social competence of exceptional students with challenging behaviors.
- add to the knowledge base of special education and related disciplines through research.
- serve and advocate for learners with individulized educational needs and others who support them.

**Methodologies/Teaching Strategies**

This course employs whole-group instruction, small-group application and practice, and digital and internet exploration.

**Assignments**

**Assignment Description**

**Bahr Ch. 1.**

<table>
<thead>
<tr>
<th>May 01</th>
<th>Due: Thursday, May 01 at 1:00 pm</th>
</tr>
</thead>
</table>

Create a bulleted outline defining and describing the 5 math processes. Example:

1. Problem solving
   - task for which the solution method is not known in advance
   - context in which mathematical understanding is acquired
   - requires environment in which students feel they can safely explore, take chances, share successful and unsuccessful conjectures/strategies, and argue perspectives.
   - metacognitive component: students must understand problem components and question
   - teachers promote thinking by asking questions that encourage reflection

**Bahr Ch. 2**

<table>
<thead>
<tr>
<th>May 06</th>
<th>Due: Tuesday, May 06 at 1:00 pm</th>
</tr>
</thead>
</table>

1. Bullet outline: learning theory, types of tools, making connections between concrete and abstract

**Teach DI lesson in class**

<table>
<thead>
<tr>
<th>May</th>
<th>Due: Thursday, May 08 at 11:59 pm</th>
</tr>
</thead>
</table>
Resurrect your final DI math lesson plan from CPSE 452 and bring a PAPER copy to class. You will teach a group of your peers, and you will do it well...or else!

### Bahr Ch. 3

| May 13 | Due: Tuesday, May 13 at 1:00 pm |

**Bullet outline:** Learning the basics of addition and subtraction

**Midterm Exam**

| May 20 | Due: Tuesday, May 20 at 1:00 pm |

**DI Lesson video: Summer unit**

| May 20 | Due: Tuesday, May 20 at 11:59 pm |

Draft and teach a fully-scripted lesson plan for a skill from one of your summer practicum units. Video record the lesson, submit lesson plan and post video in the *Digital Dialogue 5/20* folder.

### Bahr Ch. 4

| May 22 | Due: Thursday, May 22 at 1:00 pm |

**Bullet outline:** Understanding place value

### Bahr Ch. 5

| May 27 | Due: Tuesday, May 27 at 1:00 pm |

**Bullet outline:** Invented algorithms

**DI Lesson Video: Summer unit**

| May 27 | Due: Tuesday, May 27 at 11:59 pm |

Draft and teach a fully-scripted lesson plan for one of your summer units. Video record the lesson, submit lesson plan and post video in the *Digital Dialogue 5/27* folder.

### Summer math units

| May 29 | Due: Thursday, May 29 at 1:00 pm |
Create two (2) summer math units based on your CBA assessment data. Use the assigned unit planning form. Submit unit plans to the instructor.

**Bahr Ch. 6**

- **May 29**  
  Due: Thursday, May 29 at 1:00 pm

  Bullet outline: Understanding multiplication and division

  DI Brief form video: Summer unit

- **Jun 03**  
  Due: Tuesday, Jun 03 at 1:00 pm

  Draft and teach a brief-form lesson plan for one of your summer units. Video record the lesson, submit lesson plan and post video in the *Digital Dialogue 6/3* folder. Due at beginning of class.

**Bahr Ch. 7**

- **Jun 03**  
  Due: Tuesday, Jun 03 at 1:00 pm

  Bullet outline: Multidigit problems

**Bahr Ch. 10**

- **Jun 05**  
  Due: Thursday, Jun 05 at 1:00 pm

  Bullet outline: Part-whole fractions, part-set fractions, other fraction notions

  DI Brief lesson video: Fractional sense

- **Jun 10**  
  Due: Tuesday, Jun 10 at 1:00 pm

  Draft and teach a brief-form lesson plan addressing some aspect of fractional sense for your assigned summer grade level. Video record the lesson, submit lesson plan and post video in the *Digital Dialogue 6/10* folder. Due at beginning of class.

**Attendance**

- **Jun 12**  
  Due: Thursday, Jun 12 at 1:00 pm

  2 pts. awarded for each class fully attended. 1 pt. for arrival after class prayer.

  CGI video lesson: Summer unit
Draft and teach a CGI lesson plan addressing a concept from your summer math units. Video record the lesson, submit lesson plan and post video on Digital Dialogue. Due at beginning of class.

University Policies

Honor Code
In keeping with the principles of the BYU Honor Code, students are expected to be honest in all of their academic work. Academic honesty means, most fundamentally, that any work you present as your own must in fact be your own work and not that of another. Violations of this principle may result in a failing grade in the course and additional disciplinary action by the university. Students are also expected to adhere to the Dress and Grooming Standards. Adherence demonstrates respect for yourself and others and ensures an effective learning and working environment. It is the university's expectation, and my own expectation in class, that each student will abide by all Honor Code standards. Please call the Honor Code Office at 422-2847 if you have questions about those standards.

Sexual Harassment
Title IX of the Education Amendments of 1972 prohibits sex discrimination against any participant in an educational program or activity that receives federal funds. The act is intended to eliminate sex discrimination in education and pertains to admissions, academic and athletic programs, and university-sponsored activities. Title IX also prohibits sexual harassment of students by university employees, other students, and visitors to campus. If you encounter sexual harassment or gender-based discrimination, please talk to your professor or contact one of the following: the Title IX Coordinator at 801-422-2130; the Honor Code Office at 801-422-2847; the Equal Employment Office at 801-422-5895; or Ethics Point at http://www.ethicspoint.com, or 1-888-238-1062 (24-hours).

Student Disability
Brigham Young University is committed to providing a working and learning atmosphere that reasonably accommodates qualified persons with disabilities. If you have any disability which may impair your ability to complete this course successfully, please contact the University Accessibility Center (UAC), 2170 WSC or 422-2767. Reasonable academic accommodations are reviewed for all students who have qualified, documented disabilities. The UAC can also assess students for learning, attention, and emotional concerns. Services are coordinated with the student and instructor by the UAC. If you need assistance or if you feel you have been unlawfully discriminated against on the basis of disability, you may seek resolution through established grievance policy and procedures by contacting the Equal Employment Office at 422-5895, D-285 ASB.

Academic Honesty
The first injunction of the Honor Code is the call to "be honest." Students come to the university not only to improve their minds, gain knowledge, and develop skills that will assist them in their life's work, but also to build character. "President David O. McKay taught that character is the highest aim of education" (The Aims of a BYU Education, p.6). It is the purpose of the BYU Academic Honesty Policy to assist in fulfilling that aim. BYU students should seek to be totally honest in their dealings with others. They should complete their own work and be evaluated based upon that work. They should avoid academic dishonesty and misconduct in all its forms, including but not limited to plagiarism, fabrication or falsification, cheating, and other academic misconduct.
Plagiarism

Intentional plagiarism is a form of intellectual theft that violates widely recognized principles of academic integrity as well as the Honor Code. Such plagiarism may subject the student to appropriate disciplinary action administered through the university Honor Code Office, in addition to academic sanctions that may be applied by an instructor. Inadvertent plagiarism, which may not be a violation of the Honor Code, is nevertheless a form of intellectual carelessness that is unacceptable in the academic community. Plagiarism of any kind is completely contrary to the established practices of higher education where all members of the university are expected to acknowledge the original intellectual work of others that is included in their own work. In some cases, plagiarism may also involve violations of copyright law.

Intentional Plagiarism-Intentional plagiarism is the deliberate act of representing the words, ideas, or data of another as one's own without providing proper attribution to the author through quotation, reference, or footnote. Inadvertent Plagiarism-Inadvertent plagiarism involves the inappropriate, but non-deliberate, use of another's words, ideas, or data without proper attribution. Inadvertent plagiarism usually results from an ignorant failure to follow established rules for documenting sources or from simply not being sufficiently careful in research and writing. Although not a violation of the Honor Code, inadvertent plagiarism is a form of academic misconduct for which an instructor can impose appropriate academic sanctions. Students who are in doubt as to whether they are providing proper attribution have the responsibility to consult with their instructor and obtain guidance. Examples of plagiarism include: Direct Plagiarism-The verbatim copying of an original source without acknowledging the source. Paraphrased Plagiarism-The paraphrasing, without acknowledgement, of ideas from another that the reader might mistake for the author's own. Plagiarism Mosaic-The borrowing of words, ideas, or data from an original source and blending this original material with one's own without acknowledging the source. Insufficient Acknowledgement-The partial or incomplete attribution of words, ideas, or data from an original source. Plagiarism may occur with respect to unpublished as well as published material. Copying another student's work and submitting it as one's own individual work without proper attribution is a serious form of plagiarism.
