Counseling Psychology and Special Education 651  
Statistics I  
Spring 2015  
Section 1, MW 1:00-3:30pm, 102 SWKT

WHO WE ARE

Instructors:  
Peter Sanders; pwsanders7@gmail.com;  
Ken Plummer; ken_plummer@byu.edu, 3800 HBLL, 801-422-6187’

Contact us to set up an appointment.

WHERE WE ARE GOING

Course Purpose:  
It is our goal that by the end of the course you will develop fluency in using statistical concepts and procedures to make meaningful contributions in your future professions.

Course Outcomes:  
This goal is broken down into the following subcomponents or course outcomes:

You will -  
1. explain in your own words the concepts that underlie basic descriptive and inferential statistics for both parametric and non-parametric data sets.  
2. explain in your own words hypothesis testing theory and probability distributions.  
3. select appropriate statistical methods to answer basic research problems.  
4. perform analyses using statistical programs.  
5. interpret and report statistical results in APA format.

HOW WE WILL KNOW WE HAVE ARRIVED

You will take a comprehensive final exam on June 17th from 3-4:50pm in 102 SWKT. This will account for 20% of your grade.

HOW WE WILL KNOW WE ARE ON THE RIGHT TRACK

You will complete -  
1. twelve weekly assignments that will help you and us monitor your progress toward the course purpose. This will account for 50% of your grade.  
2. two final exam dress rehearsals in-class which will prepare you for the final. This will account for 30% of your grade.
HOW WE WILL GET THERE

Decision-Based Learning:

This course is designed to help you think and perform like an expert. Because experts do not think like text books or the way traditional courses are taught, an innovative instructional approach will be used in this class called Decision-Based Learning.

Decision-Based Learning is a problem or cased-based approach, where you begin with real-world problems and are then taught the decisions experts make to solve them. At each decision point you will be given “just-in-time, just-enough” instruction that will teach the concepts and theories that inform each decision. You will practice until you have internalized an expert-decision making framework. Eventually your goal will be to solve problems without the software using your own internalized-decision model as your guide.

Decision-Based Learning Software:

A software called Decision-Based Learning Software will be used to guide instruction and learning both during and out of class.

Your Role:

You should monitor your own learning constantly identifying gaps in understanding and using the resources of the course (software, textbook, instructors, other students, etc.) to fill those gaps. Note – just like learning a language at first it can seem a little tedious but with practice patterns become clear and greater fluency achieved. You will work in what are called PODs (group of two or three students) as you complete in-class learning activities.

Schedule – See Learning Suite Schedule. The schedule has all of the learning materials embedded therein.

Required Text / Software:

SPSS Statistical Software – this can be accessed in the lab during the week.

UNIVERSITY POLICIES

Honor Code

In keeping with the principles of the BYU Honor Code, students are expected to be honest in all of their academic work. Academic honesty means, most fundamentally, that any work you present as your own must in fact be your own work and not that of another. Violations of this principle may result in a failing grade in the course and additional disciplinary action by the university. Students are also expected to adhere to the Dress and Grooming Standards. Adherence demonstrates respect for yourself and others and ensures an effective learning and working environment. It is the university’s expectation, and every instructor’s expectation in class, that each student will abide by all Honor Code standards. Please call the Honor Code Office at 422-2847 if you have questions about those standards.

Sexual Harassment

Title IX of the Education Amendments of 1972 prohibits sex discrimination against any participant in an educational program or activity that receives federal funds. The act is intended to eliminate sex discrimination in education and pertains to admissions, academic and athletic programs, and university-sponsored activities. Title IX also prohibits sexual harassment of students by university employees, other students, and visitors to campus. If you encounter sexual harassment or gender-based discrimination, please talk to your professor or contact one of the following: the Title IX Coordinator at 801-422-2130; the Honor Code Office at 801-422-2847; the Equal Employment Office at 801-422-5895; or Ethics Point at http://www.ethicspoint.com, or 1-888-238-1062 FREE (24-hours).

Student Disability

Brigham Young University is committed to providing a working and learning atmosphere that reasonably accommodates qualified persons with disabilities. If you have any disability which may impair your ability to complete this course successfully, please contact the University Accessibility Center (UAC), 2170 WSC or 422-2767. Reasonable academic accommodations are reviewed for all students who have qualified, documented disabilities. The UAC can also assess students for learning, attention, and emotional concerns. Services are coordinated with the student and instructor by the UAC. If you need assistance or if you feel you have been unlawfully discriminated against on the basis of disability, you may seek resolution through established grievance policy and procedures by contacting the Equal Employment Office at 422-5895, D-285 ASB.
