Course Information

Description

IP&T/CPSE/ 745 will provide a thorough exposure and application of multiple regression analysis which is the foundation for a wide variety of subsequent statistical procedures including path analysis, factor analysis, structural equation modeling, and hierarchical linear modeling.

Prerequisites

IP&T 651/CPSE 651 or equivalent.

Materials

MULTIPLE REGRESSION AND BEYOND

2E Required

by KEITH, T
Learning Outcomes

Conceptual understanding and practice application of statistics
Focusing more on concepts than computation will allow us to cover more ground with more practice of each concept. By integrating the course with training in SPSS, students will be prepared to select and execute appropriate analytical strategies in their applied research and practice.

Demonstrate fluency
- All students will demonstrate fluency in SPSS commands and functions.
- All students will demonstrate fluency in interpreting SPSS output files.
- All students will demonstrate fluency in selecting the appropriate statistical analysis based on the research questions and the nature of the data.
- All students will demonstrate fluency in interpreting SPSS output files.
- All students will demonstrate fluency in selecting the appropriate statistical analysis based on the research questions and the nature of the data.
- All students will demonstrate fluency in SPSS commands and functions.
- All students will demonstrate fluency in interpreting SPSS output files.
- All students will demonstrate fluency in selecting the appropriate statistical analysis based on the research questions and the nature of the data.
- All students will demonstrate fluency in SPSS commands and functions.
- All students will demonstrate fluency in interpreting SPSS output files.
- All students will demonstrate fluency in selecting the appropriate statistical analysis based on the research questions and the nature of the data.

Demonstrate fluency
All Students will demonstrate the ability to analyze, understand, and critique multiple regression in a journal article.

Assignments
Assignment Descriptions

Day 1 - Homework

Due: Monday, Jan 22 at 1:00 pm
Day 1 - Homework

Day 2 - Quiz

Due: Monday, Jan 22 at 2:10 pm
Quiz #1

Data Gathering Assignment

Due: Monday, Jan 22 at 4:00 pm

Report back whether you have a dataset (including a continuous dependent variable, and at least two independent variables) through either (a) any NCES dataset (e.g., ECLS-K, NELS), (b) data you have gathered yourself, or (c) data you have access to.

Reading Accountability Quiz 1

Due: Monday, Jan 22 at 4:00 pm

This Quiz will assess your readings up to this point. You should have read the following before today: Keith Preface; Keith Appendix B; Keith 6; Keith 1-3; and Keith 9

Sample Standard Deviation Quiz 1

Due: Monday, Jan 22 at 11:59 pm

1) Memorize and prepare to write down in Class the Sample Standard Deviation.
2) Prepare to do a sample standard deviation on a very small dataset by hand.

**P-value quiz 1**

Due: Monday, Jan 22 at 11:59 pm

1) Memorize and prepare to write down in class the definition of a p-value.

**One Minute Paper 1**

Due: Monday, Jan 22 at 11:59 pm

Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

**One Minute Paper 2**

Due: Tuesday, Jan 23 at 11:59 pm

Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

**Day 2 - In-class Practice**

Due: Monday, Jan 29 at 1:00 pm

**Reading Accountability Quiz 2**

Due: Monday, Jan 29 at 3:00 pm

This Quiz will assess your readings up to this point. You should have read the following at least once before today: Keith Preface; Keith Appendix B; Keith 6; Keith 1-3; Keith 9; Keith 6; and Keith 4.
Formative Quiz 1 (Regression, Linearity)

Jan

29

Due: Monday, Jan 29 at 3:59 pm
This quiz will discuss centering variables and the linearity assumption.

One Minute Paper 3

Jan

30

Due: Tuesday, Jan 30 at 11:59 pm
Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

Formative Quiz 2 (CLT, Equality of Variance, Multicollinearity)

Feb

10

Due: Saturday, Feb 10 at 6:45 pm
Helps you synthesize your learning

One Minute Paper 4

Feb

10

Due: Saturday, Feb 10 at 11:59 pm
Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

Day 4 - Quiz

Feb

12

Due: Monday, Feb 12 at 1:00 pm
Day 4 - Quiz
Reading Accountability Quiz 3

Due: Monday, Feb 12 at 7:00 pm
Have you read Keith 5 before today?

Formative Quiz 3 (three types of regression)

Due: Monday, Feb 12 at 9:00 pm
To help you in understanding the three types of regression

Day 3 - In-Class Practice

Due: Wednesday, Feb 14 at 1:00 pm
Day 3 - In-Class Practice

Day 4 - Inclass practice

Due: Wednesday, Feb 14 at 3:50 pm
Day 4 - Inclass practice

One Minute Paper 5

Due: Saturday, Feb 17 at 11:59 pm
Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.
### Day 5 - Quiz

Due: Tuesday, Feb 20 at 1:00 pm

### Formative Quiz 4 (Interactions)

Due: Tuesday, Feb 20 at 1:59 pm
This will help your understanding of interaction effects.

### Day 5 - Inclass practice

Due: Tuesday, Feb 20 at 4:00 pm

### Day 5 - Homework

P-value Quiz 2

Due: Monday, Feb 26 at 11:59 pm

Standard Deviation Quiz 2

Due: Monday, Feb 26 at 11:59 pm
One Minute Paper 6

Due: Monday, Feb 26 at 11:59 pm
Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

Beta Quiz

Due: Monday, Feb 26 at 11:59 pm

Day 3 - Quiz

Due: Wednesday, Feb 28 at 12:50 pm
Quiz #3

Day 3 - Homework

Due: Wednesday, Feb 28 at 1:00 pm
Day 3 - Homework

Day 2 - Homework

Due: Wednesday, Feb 28 at 1:00 pm
Day 2 – Homework
Day 4 - Homework

Feb 28

Due: Wednesday, Feb 28 at 1:00 pm

Day 4 - Inclass practice

MiniProject

Mar 05

Due: Monday, Mar 05 at 12:59 pm

A scientist needs a prediction model for happiness. He is interested in the simplest model that can predict happiness the best, of the following variables. Comparative wealth, Education, male, FamilySize. Remember he is only interested in prediction. Give him the simplest model the best predicts happiness (don't forget to check your assumptions.) Submit a 5 slide powerpoint with your conclusions. Make sure to include your justifications for this conclusion.

MiniProjectData.csv  Download

Day 7 - Quiz

Mar 05

Due: Monday, Mar 05 at 12:59 pm

Day 7 - Quiz

Day 6 - Inclass practice

Mar 05

Due: Monday, Mar 05 at 1:00 pm

Day 6 - Inclass practice

Day 6 - Homework

Mar 05

Due: Monday, Mar 05 at 1:00 pm

Day 6 - Homework
Day 7 - Homework

Due: Monday, Mar 05 at 1:00 pm

Day 6 - Homework part 2

Day 7 - In-class

Due: Monday, Mar 05 at 1:00 pm

Day 6 - In-class part 2

Day 6 - Quiz

Due: Monday, Mar 05 at 4:30 pm

Day 5 - Quiz

Individual Project

Due: Monday, Mar 05 at 11:59 pm

Find a secondary dataset (preferably in your field)
Analyze your dataset using SPSS or program of your choice.
Include a continuous outcome.
Include at least two Independent Variables.
Include at least One Interaction
Create a Powerpoint in APA style that includes up to 20 slides. You will present these results in class and answer questions during your presentation.
Below is a suggested slide composition:
Slide 1: Title page, include your name and the name of your project
Slide 2: Briefly describe the theoretical backdrop of your problem (why is your problem interesting?)
Slides 3-5: Show Raw Descriptives (Mean, Minimum, Maximum, Standard Deviation) of all your variables (excluding the interaction), a Histogram of your outcome variable and a bivariate correlation table of your variables after you have prepared the data (including the interaction)
Slides 6-9: Assumptions: Show your Residual plot, histogram of your residuals, Variance Inflation Factors, and discuss any potential outliers. (this may take more slides than 1).
Slide 10: Show a table of your output including, R-squared, Betas, Standardized Betas, Standard errors and p-values. Interpret your output in context.
Slide 11: Have a graph of your interaction whether it is significant or not. Be prepared to discuss.
Slide 12: Brief discussion on the significant of your results.
Submit to Learning Suite:
Your Slides
Your Data
Your Syntax
Your Output.

Article Review

Due: Monday, Mar 05 at 11:59 pm
Find an article in your field that uses Multiple Regression.
Prepare 5 Powerpoint slides in APA that you will present to class.
Slide 1: Title page with your name, and the reference to the article
Slide 2: Brief description of the theory of the article (why is the article interesting)
Slide 3: Discuss the assumptions of multiple regression and whether they are met in the article.
Slide 4: Show the table the authors provided that show the Multiple Regression results. Be prepared to interpret the results in context.
Slide 5: A brief discussion on the practical significance of the article and whether you are confident in the authors inferences. State the strengths and weaknesses of the article and give your best assessment of the level of evidence (low, moderate, strong) for the article according to the WWC handout.

One Minute Paper 7

Due: Monday, Mar 05 at 11:59 pm
Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

Mini Project 2

Due: Monday, Mar 12 at 1:00 pm
Dr. Larsen is interested in discovering what makes people happy. He has a data set with many variables, however he is only interested in investigating whether or not the following affect happiness:
• Imagination
• Intelligence
• HrsSleep
• Openness to Experience
• Neuroticism
• Depression
• Agreeableness
• Conscientiousness
• Extraversion

Remember he is only interested in prediction. Give him the simplest model that best predicts happiness (don't forget to check your assumptions.)
Submit a 5 slide powerpoint with your conclusions. Make sure to include your justifications for this conclusion.

<thead>
<tr>
<th>Mar</th>
<th>12</th>
</tr>
</thead>
<tbody>
<tr>
<td>Due: Monday, Mar 12 at 11:59 pm</td>
<td></td>
</tr>
</tbody>
</table>

Write one thing you learned from class today.
Write one thing you are still confused from class today.
Your writing will be shared with all at the beginning of the next class period.

**Happiness Regression**

<table>
<thead>
<tr>
<th>Mar</th>
<th>25</th>
</tr>
</thead>
<tbody>
<tr>
<td>Due: Sunday, Mar 25 at 2:00 pm</td>
<td></td>
</tr>
</tbody>
</table>

You need to create your own model for happiness and then share it with a friend. Using regression techniques, try to recover your friend's model. Report here when finished.

**Formative Quiz 5 (Logistic Regression)**

<table>
<thead>
<tr>
<th>Apr</th>
<th>12</th>
</tr>
</thead>
<tbody>
<tr>
<td>Due: Thursday, Apr 12 at 9:00 am</td>
<td></td>
</tr>
</tbody>
</table>

Where we go over the concepts of logistic regression. When it is used, how to interpret the results.
Formative Quiz 6 (Multilevel Model)

Due: Tuesday, Apr 17 at 9:59 am
Testing the concepts in the book on Multilevel modeling (228-140)

Final Exam III

Due: Tuesday, Apr 17 at 11:45 pm
The final exam will consist of three parts: (a) Procedural Fill in the blank (b) Mini-Project #3 (c) Conceptual opened questions This is an open book, closed neighbor exam.

Final Exam Part I

Due: Tuesday, Apr 17 at 11:59 pm
The final exam part one. This part of the final covers the procedural tasks you should have learned in the class.

University Policies

Honor Code

In keeping with the principles of the BYU Honor Code, students are expected to be honest in all of their academic work. Academic honesty means, most fundamentally, that any work you present as your own must in fact be your own work and not that of another. Violations of this principle may result in a failing grade in the course and additional disciplinary action by the university. Students are also expected to adhere to the Dress and Grooming Standards. Adherence demonstrates respect for yourself and others and ensures an effective learning and working environment. It is the university’s expectation, and every instructor’s expectation in class, that each student will abide by all Honor Code standards. Please call the Honor Code Office at 422-2847 if you have questions about those standards.

Preventing Sexual Misconduct

In accordance with Title IX of the Education Amendments of 1972, Brigham Young University prohibits unlawful sex discrimination against any participant in its education programs or activities. The university also prohibits sexual harassment—including sexual violence—committed by or against students, university employees, and visitors to campus. As outlined in university policy, sexual harassment, dating violence, domestic violence, sexual assault, and stalking are considered forms of “Sexual Misconduct” prohibited by the university.

University policy requires all university employees in a teaching, managerial, or supervisory role to report all incidents of Sexual Misconduct that come to their attention in any way, including but not limited to face-to-face conversations, a written class assignment or paper, class discussion, email, text, or social media post. Incidents of Sexual Misconduct should be reported to the Title IX Coordinator at titleixcoordinator@byu.edu or (801) 422-8692. Reports may also be submitted through EthicsPoint at https://titleix.byu.edu/report or 1-888-238-1062 (24-hours a day).

BYU offers confidential resources for those affected by Sexual Misconduct, including the university’s Victim Advocate, as well as a number of non-confidential resources and services that may be helpful. Additional information about Title IX, the university’s Sexual Misconduct Policy, reporting requirements, and resources can be found at http://titleix.byu.edu or by contacting the university’s Title IX Coordinator.

Student Disability

Brigham Young University is committed to providing a working and learning atmosphere that reasonably accommodates qualified persons with disabilities. If you have any disability which may impair your ability to complete this course successfully, please contact the University Accessibility Center (UAC), 2170 WSC or 422-2767. Reasonable academic accommodations are reviewed for all students who have qualified, documented disabilities. The UAC can also assess students for learning, attention, and emotional concerns. Services are coordinated with the student and instructor by the UAC. If you need assistance or if you feel you have been unlawfully discriminated against on the basis of disability, you may seek resolution through established grievance policy and procedures by contacting the Equal Employment Office at 422-5895, D-285 ASB.
