Perceptions of Home Notes: Parental Involvement in Teaching Social Skills

Michael Adams
Ryan Shatzer
Sue Womack
Paul Caldarella
Introduction
Parental Involvement

• Teachers and parents share common goals for children

• Parental involvement can
  • Improve Academics
  • Improve Student Behavior
  • Lower Absenteeism

(Cox, 2005; Epstein, 1986)
“Many teachers believe that they can only be effective if they have parental assistance with learning activities in the home.”

(Epstein, 1986)
Three Reasons to Involve Parents

• Students primary caretaker

• Natural setting at home and in community

• Opportunities arise at home not at school

(Schulze et al., 1989)
Difficulties with Parental Involvement

- May lack motivation or ability
- Difficult to design programs for parents
- Parents may view programs as a judgment on their ability to parent

(Mize & Abell, 1996; Schulze, et al, 1989)
Keys to Overcome Difficulties

- Brevity
- Fits Daily Routine

(Shulze, Rule & Innocenti, 1989)
Social Skills

• Social skills are:
  “Socially acceptable learned behaviors enabling individuals to interact effectively with others and avoid or escape socially unacceptable behaviors exhibited by others.”

• Teaching social skills is a method of communicating society’s behavioral expectations

• Benefits and risks regarding social skills

(Gresham, 1998; McArthur, 2002; Utay & Utay, 2005)
Social Skills in Education

- Social skill instruction has traditionally occurred in special education.

- “Social skill interventions have begun to target children who do not have identified disabilities but can clearly benefit from deliberate social skill instruction”

(Townsend, 2004, p.31)
Positive Behavior Support

Targeted/Intensive: 3-5% high-risk students

Selected: 7-10% at-risk students (small group)

Universal: 80-90% of students respond to SWPBS

- Social Skills Instruction is among universal intervention programs
- Proactive approach for all students
- SWPBS values parents being partners in their child’s educational experience

(Horner & Sugai, 2002; Lane & Beebe-Frankenberger, 2004; Muscott et al., 2008)
Difficulties

• Generalization and Maintenance

• Lack of teacher support
  • Teachers may feel it is not their role
  • NCLB Pressure

(Siperstein & Bak, 1988; Stokes & Baer, 1977)
Research Aims

• Purpose
  • Evaluate the use of a Home Note program as a way to involve parents in teaching and reinforcing social skills as a universal level PBS intervention
  • Examine stakeholder perceptions of a Home Note program
Method
Setting

• Suburban Elementary School
  – 436 Students
  – Over 50% Free and Reduced
  – Ethnicity
    75% Caucasian
    21% Hispanic
    2% African American
    2% Other
Universal Interventions

- Social Skill Instruction
- Written Praise Notes
- School Pledge

- Distributed and collected by teachers
- Goal 85%
**Grizzly Pride Begins With Me!**

Dear First or Second Grade Parent:

Our Grizzly Pride **social skill** for January is:

**HOW TO FOLLOW DIRECTIONS**
- **Step 1** Look at the person.
- **Step 2** Say, “O.K.” (or, show you understand)
- **Step 3** Do the task immediately.
- **Step 4** Report back, if necessary.

This month we are reviewing the social skill, **HOW TO FOLLOW DIRECTIONS**. We have discussed these steps at school, but we hope that you will also review these steps at home.

In order to help you review these steps, we are asking that you play a **MATCHING GAME** as a family. Hopefully your child can take the lead in starting the game, but you might need to help him/her by reading what is on each card. The game is simple. **Cut apart the cards found on the opposite side of this sheet.** Lay out the match game cards, upside down, on the floor or on a table. Family members take turns flipping two cards over to try to get a match. To get a match you need to match the skill with which step it is, for example, the card that says ‘Look at the person.’ will match with the card, ‘Step 1.’ There is also a match for the name of this social skill (How to Follow Directions) and this month (January’s social skill). Have fun!

Thank you once again for your help with our Grizzly Pride program. **When you have finished this activity, please sign below, and send this portion of the home note back by Friday** to receive credit on the Grizzly Pride classroom chart. Remember, if at least 95% of the notes are returned, the class earns a reward.

Grizzly Pride Begins With Me!

The social skill for October is **HOW TO ACCEPT RESPONSIBILITY**.

The steps for this social skill are:
1. Ask yourself: Did I do it?
2. Accept the result.
3. No arguing, blaming, or whining.

This month we are going to have a **What if?** activity. Take this note home and read the following situations with your family and have a discussion about what you should do to accept responsibility.

#1 WHAT IF you were playing kickball with a large group of kids during recess at school. When it was your turn to kick the ball, you accidentally hit a window and broke it. What should you do?

#2 WHAT IF you walked into your parent’s bedroom and saw some money sitting on their dresser. You were all alone and you really wanted to have the money, so you took it. Later on, your parents noticed that the money was missing and asked everyone in your family what happened to it. What should you do?

When you have discussed these situations with your family, have a parent sign below and **bring this note back by Friday, October 15th**

*Factor I: Favorability (α = .91)  † Factor II: Increase Activities (α = .86)
Parents’ Survey Results

- Parents also reported how many Home Note activities they completed with their children.
- There was a significant correlation between the number of Home Notes completed and parents’ ratings of favorability ($r = .26, p < .01$).
- Parents had similar perceptions regardless of their children’s grade level or teacher.
Parents’ Qualitative Results

- Open-ended comments section
- 32% of the parents gave comments
  - 34 out of the 107 parents
- Parents responded favorably:
  - Rate of 7:1
- Individual comments:
  - 60% Positive
  - 20% Negative
  - 20% Suggestions
Distribution of Parents’ Comments

## Parents’ Positive Comments

<table>
<thead>
<tr>
<th>Parent Themes</th>
<th>Sample Parent Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Appreciation</td>
<td>“I am grateful to see my child learning these things...” (Parent #4)</td>
</tr>
<tr>
<td>Program Worth</td>
<td>“We as parents think this is a great program and we do try to implement the skills in our home. We think any focus on problem solving, responsibility, etc. is very good, especially when families continue to try to use these skills with their children.” (Parent of student #302)</td>
</tr>
<tr>
<td>Program Impact</td>
<td>“They are always things that will be useful throughout their lives! Thank you!” (Parent #8)</td>
</tr>
<tr>
<td>Partnership</td>
<td>“Home note activities is very good idea the way I and my child sit together [and] talk about school. So th[at] way [I] know what my child [is] doing in school.” (Parent #54)</td>
</tr>
</tbody>
</table>
Parents’ Negative Comments

• 21% of comments were negative (12 of 57)
  – Tended to convey a feeling of burden
    • “They just cause stress to me.” (Parent #52)
    • “For the most part this just feels like one more thing to think about, and I am not sure if my kids really internalize the ideas. I could take or leave the program.” (Parent #10)
  – One felt that the Home Notes implied that parents weren’t doing a good job
    • “It seems that most of the skills in these home notes should be taught at home and reinforced at school. They are kind of insulting like we as parents are sending you heathen children with no manners. Thanks for the confidence??? They are an invasive waste of time.” (Parent #76)

</table>

*Factor I: Favorability (α = .90)
† Factor II: Administration (α = .88)
Teachers’ Survey Results

• Open-ended comments
• Although not significant, a negative correlation exists between the teachers number of years they used Home Notes and their favorability towards the program
  \( r = -0.38, p = .10 \)
• Teachers’ perceptions did not differ by grade level
Summary

• Program
  • Easy to administer fit daily routine

• Perceptions
  • Parents were most favorable
  • Students had favorable perceptions
  • Teachers were neutral
    • Wanted to continue using program
    • Repetitive after six years

• Further research
  • Addition of Outcomes Measure
  • Look at effects across tiers
Suggestions for Improvement

Parents
• Inform Early of the Scope
• Consolidate across grades
• Keep them involved in the process

Teachers
• Get teachers more involved
• Share what you learned here

Students
• Integrate with Homework
• Consistency in Procedures
• Activities that appeal to a broad age range
