## STORY: VAMPIRE COOKIES

One late night in Transylvania, there was a little vampire named Billy who couldn't sleep. He wanted some milk and cookies. He wasn't allowed to have them so late at night, so he tried to sneak out of his room without his vampire parents finding out. His door was locked, so he bit off his door handle with his sharp teeth and snuck down the hall. The floor creaked as he tiptoed to the kitchen, and his pet dog woke up and started barking. Billy ran to hide in the cupboard, but some flour fell on him. Hearing the dog, Billy's dad woke up and put the dog in the backyard. As his dad passed by the cupboard, Billy sneezed.

What happened next? (Add two more obstacles and two tactics, then create an ending. Does Billy achieve his objective or not?)
