

Participants needed for Cognitive Research Study

We are conducting a study to understand brain development.

We need adults 18 years and older
that have been diagnosed with autism spectrum
disorder (Aspergers, autism, PDD)

Participation in the study requires:

1. Completion of questionnaires
2. Brief computerized testing
3. Diagnostic and cognitive testing
4. MRI Brain Scan

Participants will receive up to 70 dollars for their
participation.
