Course Information

Description

The purpose of this class is to acquaint you with the fields of speech-language pathology and audiology. We will discuss a range of communication processes as well as some of the communication disorders that can affect these processes. We will also discuss what speech-language pathologists (SLPs) and audiologists do in order to facilitate communication in individuals with communicative impairments.

Materials

Image	Item	Vendor	Price (new)	Price (used)
	Communication Sciences and Disorders: A Contemporary Perspective with What Every Speech-Language Pathologist/Audiologist Should Know about Alternative and Augmentative Communication (2nd Edition) Required by Justice, Laura M. Pearson; Edition 2 (1261897200) ISBN: 9780137081530	BYU Bookstore	122.15	91.65

Learning Outcomes

Human Communication and Systems

Demonstrate basic understanding of human communication and the systems involved.

Clinical Applications

Demonstrate an initial understanding of the clinical applications of the fields of speech-language pathology and audiology.

Basic Concepts and Terms

Demonstrate understanding of some basic concepts and terms associated with the practice of speech-language pathology and audiology.

Familiarity with Disorders and Professions

Demonstrate basic familiarity with a variety of communication disorders and the professions of speech-language pathology and audiology.

Grading Policy

You will be expected to attend class, complete quizzes and any assignments, take themidterm and the final exams. The quizzes and exams will cover

assigned reading material as well as information presented in class. Grades will be assigned based on total points received. You will be allowed to drop your lowest quiz score. Make-up quizzes may be offered only in cases of illness or university excused absences.

Documentation of illness is required to make up a quiz. Quizzes may be unannounced, so it is best to come to class prepared. The midterm and final exams will be offered in the testing center. The test format will be objective (multiple choice, true/false, matching, etc.). Quizzes may be short answer, short essay, or objective. Please note that inasmuch as your lowest quiz score will be dropped, we do NOT offer extra credit opportunities for this class. This policy applies to ALL students.

Classroom Procedures

Please be attentive and respectful in class. Even if you do not want to listen, there is always the offhand chance that someone else does. Please turn off your cell phones and refrain from texting, surfing the internet, playing video games, or finding other fascinating things to do on your computer/phone/iPad, etc. during class. If you need to talk on your cellphone, send or read texts, visit with your classmates, read the paper, check your facebook, find out about movie times, etc. please be gracious enough to leave the classroom to do it. If it is evident that you are engaged in any of these activities in class, you will receive a zero on the next (or previous) quiz. If you struggle with alertness in class, feel free to stand up at the back of the class for a few minutes. (Believe me, I understand—I attended meetings for a living for over 10 years.) Please avoid sleeping (especially snoring) in class. It hurts the instructor's feelings. The Powerpoint slides shown in class will NOT be available on Learning Suite. It is important that you attend class and pay attention to the information presented in class. If you have questions about information presented in class or on the slides, feel free to contact a TA or the instructor. The teaching assistants will have copies of the Powerpoints, and you are welcome to review these slides with a TA during office hours.

Assignments

Assignment Description

Midterm Exam

Due: Thursday, Oct 17 at 12:59 am

Media Assignment

Due: Tuesday, Nov 19 at 5:59 pm

For the media assignment, you will need to watch the HBO movie, Temple Grandin. This movie is available for check out in the library. If you would prefer to watch an interview with Dr. Grandin, you may watch the episode of Conversations from PennState in which Patty Satalia interviews Dr. Grandin.
